MEXCO ENERGY CORPORATION AND SUBSIDIARIES  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
(Unaudited)

### 1. Nature of Operations

Mexco Energy Corporation (a Colorado corporation) and its wholly owned subsidiaries, Forman Energy Corporation (a New York corporation), Southwest Texas Disposal Corporation (a Texas corporation) and TBO Oil & Gas, LLC (a Texas limited liability company) (collectively, the “Company”) are engaged in the exploration, development and production of natural gas, crude oil, condensate and natural gas liquids (“NGLs”). Most of the Company’s oil and gas interests are centered in West Texas; however, the Company owns producing properties and undeveloped acreage in twelve states. Although most of the Company’s oil and gas interests are operated by others, the Company operates several properties in which it owns an interest.

### 2. Basis of Presentation and Significant Accounting Policies

**Principles of Consolidation.** The consolidated financial statements include the accounts of Mexco Energy Corporation and its wholly owned subsidiaries. All significant intercompany balances and transactions associated with the consolidated operations have been eliminated.

**Estimates and Assumptions.** In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make informed judgments, estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and affect the reported amounts of revenues and expenses during the reporting period. In addition, significant estimates are used in determining year end proved oil and gas reserves. Although management believes its estimates and assumptions are reasonable, actual results may differ materially from those estimates. The estimate of the Company’s oil and natural gas reserves, which is used to compute depreciation, depletion, amortization and impairment of oil and gas properties, is the most significant of the estimates and assumptions that affect these reported results.

**Interim Financial Statements.** In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting only of normal recurring accruals) necessary to present fairly the financial position of the Company as of June 30, 2014, and the results of its operations and cash flows for the interim periods ended June 30, 2014 and 2013. The financial statements as of June 30, 2014 and for the three month periods ended June 30, 2014 and 2013 are unaudited. The consolidated balance sheet as of March 31, 2014 was derived from the audited balance sheet filed in the Company’s 2014 annual report on Form 10-K filed with the Securities and Exchange Commission (“SEC”). The results of operations for the periods presented are not necessarily indicative of the results to be expected for a full year. The accounting policies followed by the Company are set forth in more detail in Note 2 of the “Notes to Consolidated Financial Statements” in the Form 10-K. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the SEC. However, the disclosures herein are adequate to make the information presented not misleading. It is suggested that these financial statements be read in conjunction with the financial statements and notes thereto included in the Form 10-K.

**Reclassifications.** Certain amounts in prior years’ financial statements have been reclassified to conform with the current year’s presentation. These reclassifications had no effect on previously reported results of operations or retained earnings.

**Recent Accounting Pronouncements.** In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, Topic 606: Revenue from Contracts with Customers. ASU No. 2014-09 is effective for Mexco as of April 1, 2017. Management is evaluating the effect, if any this pronouncement will have on our consolidated financial statements.

### 3. Asset Retirement Obligations

The Company’s asset retirement obligations (“ARO”) relate to the plugging of wells, the removal of facilities and equipment, and site restoration on oil and gas properties. The fair value of a liability for an ARO is recorded in the period in which it is incurred, discounted to its present value using the credit adjusted risk-free interest rate, and a corresponding amount capitalized by increasing the carrying amount of the related long-lived asset. The liability is accreted each period, and the capitalized cost is depreciated over the useful life of the related asset.

The ARO is included on the Consolidated Balance Sheets with the current portion being included in the accounts payable and other accrued expenses.

The following table provides a rollforward of the AROs for the first three months of fiscal 2015:

Carrying amount of asset retirement obligations as of April 1, 2014	\$ 961,577
Liabilities incurred	782
Liabilities settled	-
Accretion expense	4,835
Carrying amount of asset retirement obligations as of June 30, 2014	<u>967,194</u>
Less: Current portion	35,000
Non-Current asset retirement obligation	<u>\$ 932,194</u>

#### 4. Stock-based Compensation

The Company recognized compensation expense of \$24,276 and \$39,372 in general and administrative expense in the Consolidated Statements of Operations for the three months ended June 30, 2014 and 2013, respectively. The total cost related to non-vested awards not yet recognized at June 30, 2014 totals approximately \$101,168 which is expected to be recognized over a weighted average of 1.84 years.

Included in the following table is a summary of the grant-date fair value of stock options granted and the related assumptions used in the Binomial models for stock options granted during the three months ended June 30, 2014 and 2013. All such amounts represent the weighted average amounts.

	Three Months Ended June 30	
	2014	2013
Grant-date fair value	-	\$ 4.75
Volatility factor	-	77.01%
Dividend yield	-	-
Risk-free interest rate	-	1.74%
Expected term (in years)	-	7

The following table is a summary of activity of stock options for the three months ended June 30, 2014

	Number of Shares	Weighted Average Exercise Price Per Share	Weighted Aggregate Average Remaining Contract Life in Years	Intrinsic Value
Outstanding at March 31, 2014	<u>113,600</u>	\$ 6.35	7.66	\$ 154,062
Granted	-	-		
Exercised	-	-		
Forfeited or Expired	-	-		
Outstanding at June 30, 2014	<u>113,600</u>	\$ 6.35	7.41	\$ 222,222
Vested at June 30, 2014	57,350	\$ 6.39	7.00	\$ 37,372
Exercisable at June 30, 2014	57,350	\$ 6.39	7.00	\$ 37,372

Outstanding options at June 30, 2014 expire between August 2020 and April 2023 and have exercise prices ranging from \$5.98 to \$6.80.

#### 5. Fair Value of Financial Instruments

Fair value as defined by authoritative literature is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. Fair value measurements are classified and disclosed in one of the following categories:

Level 1 – Quoted prices in active markets for identical assets and liabilities.

Level 2 – Quoted prices in active markets for similar assets and liabilities, quoted prices for identical or similar instruments in markets that are not active and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

Level 3 – Significant inputs to the valuation model are unobservable.

Financial assets and liabilities are classified based on the lowest level of input that is significant to the fair value measurement.

The carrying amount reported in the accompanying consolidated balance sheets for cash and cash equivalents, accounts receivable and accounts payable approximates fair value because of the immediate or short-term maturity of these financial instruments.

The fair value amount reported in the accompanying consolidated balance sheets for long term debt approximates fair value because the actual interest rates do not significantly differ from current rates offered for instruments with similar characteristics and is deemed to use Level 2 inputs. See the Company's Note 6 on Credit Facility for further discussion.

The fair value of the Company's crude oil swaps are measured internally using established commodity futures price strips for the underlying commodity provided by a reputable third party, the contracted notional volumes, and time to maturity. The valuation of the Company's derivative instrument is deemed to use Level 2 inputs. See the Company's Note 8 on Derivatives for further discussion.

## 6. Credit Facility

The Company has a revolving credit agreement with Bank of America, N.A. (the "Agreement"), which provides for a credit facility of \$4,900,000 with no monthly commitment reductions and a borrowing base evaluated annually, currently set at \$4,900,000. Amounts borrowed under the Agreement are collateralized by the common stock of the Company's wholly owned subsidiaries and substantially all of the Company's oil and gas properties. Availability of this line of credit at June 30, 2014 was \$2,444,333. No principal payments are anticipated to be required through November 30, 2015.

The Agreement was renewed seven times with seventh amendment on October 25, 2013, which revised the maturity date to November 30, 2015. Under the original and renewed agreements, interest on the facility accrues at an annual rate equal to the British Bankers Association London Interbank Offered Rate ("BBA LIBOR") daily floating rate, plus 2.50 percentage points, which was 2.6495% on June 30, 2014. Interest on the outstanding amount under the credit agreement is payable monthly. In addition, the Company will pay an unused commitment fee in an amount equal to ½ of 1 percent (.5%) times the daily average of the unadvanced amount of the commitment. The unused commitment fee is payable quarterly in arrears on the last day of each calendar quarter.

The Agreement contains customary covenants for credit facilities of this type including limitations on disposition of assets, mergers and reorganizations. The Company is also obligated to meet certain financial covenants under the Agreement. The Company is in compliance with all covenants as of June 30, 2014. In addition, this Agreement prohibits the Company from paying cash dividends on its common stock. The Agreement does grant the Company permission to enter into hedge agreements; however, the Company is under no obligation to do so.

The amended Agreement allows for up to \$500,000 of the facility to be used for outstanding letters of credits. As of June 30, 2014, two letters of credit for \$50,000 and \$105,667, in lieu of plugging bonds with the Texas Railroad Commission ("TRRC") covering the properties the Company operates, are outstanding under the facility. These letters of credit renew annually. The Company will pay a fee in an amount equal to 1 percent (1.0%) per annum of the outstanding undrawn amount of each standby letter of credit, payable monthly in arrears, on the basis of the face amount outstanding on the day the fee is calculated.

The following table is a summary of activity on the Bank of America, N.A. line of credit for the three months ended June 30, 2014:

	<u>Principal</u>
Balance at March 31, 2014:	\$ 2,425,000
Borrowings	-
Repayments	125,000
Balance at June 30, 2014:	<u>\$ 2,300,000</u>

## 7. Income Taxes

The income tax provision consists of the following for the three months ended June 30, 2014 and 2013:

	2014	2013
Current income tax expense	\$ -	\$ -
Deferred income tax (benefit) expense	(17,381)	6,818
Total income tax provision	<u>\$ (17,381)</u>	<u>\$ 6,818</u>

This change in our effective tax rate was primarily the result of an increase in statutory depletion carryforward for the three months ended June 30, 2014.

## 8. Derivatives

All derivative financial instruments are recorded at fair value. The Company has not designated its derivative instruments as hedges for accounting purposes and, as a result, marks its derivative instruments to fair value and recognizes the realized and unrealized changes in fair value in the consolidated statements of operations under the caption "Loss on derivative instruments."

The Company has used price swap contracts to reduce price volatility associated with certain of its oil sales. With respect to the Company's fixed price swap contracts, the counterparty is required to make a payment to the Company if the settlement price for any settlement period is less than the swap price, and the Company is required to make a payment to the counterparty if the settlement price for any settlement period is greater than the swap price. The Company's derivative contracts are based upon reported settlement prices on commodity exchanges, with crude oil derivative settlements based on New York Mercantile Exchange West Texas Intermediate ("NYMEX WTI") pricing. The counterparty to the Company's derivative contract is Merrill Lynch Commodities, Inc., which the Company believes is an acceptable credit risk.

As of June 30, 2014 the Company had the following open crude oil derivative positions with respect to future production based on NYMEX WTI pricing:

Production Period	Volume (bbls)	Fixed Swap Price
July 2014 – March 2015	4,500	\$ 90.00

The fair value of swaps is generally determined using established index prices and other sources which are based upon, among other things, futures prices and time to maturity.

The net fair value of the Company's derivative assets and liabilities and their locations on the consolidated balance sheet are as follows:

	June 30, 2014	March 31, 2014
Current assets: Derivative instruments	\$ -	\$ -
Noncurrent assets: Derivative instruments	-	7,239
Total assets	<u>\$ -</u>	<u>\$ 7,239</u>
Current liabilities: Derivative instruments	\$ 59,121	\$ 44,981
Noncurrent liabilities: Derivative instruments	-	-
Total liabilities	<u>\$ 59,121</u>	<u>\$ 44,981</u>

None of the Company's derivatives have been designated as hedges. As such, all changes in fair value are immediately recognized in earnings. The following summarizes the loss on derivative instruments included in the consolidated statements of operations three months ended June 30, 2014 and 2013:

	2014	2013
Unrealized loss on open non-hedge derivative instruments	\$ (14,139)	\$ (21,057)
Loss on settlement of non-hedge derivative instruments	(19,489)	(6,335)
Total loss on derivative instruments	<u>\$ (33,628)</u>	<u>\$ (27,392)</u>

## 9. Related Party Transactions

Related party transactions for the Company relate to shared office expenditures in addition to administrative and operating expenses paid on behalf of the majority stockholder. The total billed to and reimbursed by the stockholder for the quarter ended June 30, 2014 and 2013 were \$28,077 and \$32,534, respectively.

## 10. Income Per Common Share

The Company's basic net income per share has been computed based on the weighted average number of common shares outstanding during the period. Diluted net income per share assumes the exercise of all stock options having exercise prices less than the average market price of the common stock during the period using the treasury stock method. In periods where losses are reported, the weighted average number of common shares outstanding excludes potential common shares, because their inclusion would be anti-dilutive.

The following is a reconciliation of the number of shares used in the calculation of basic income per share and diluted income per share for the three month periods ended June 30, 2014 and 2013.

	2014	2013
Net income	\$ 19,054	\$ 16,131
Shares outstanding:		
Weighted average common shares outstanding – basic	2,038,266	2,036,866
Effect of the assumed exercise of dilutive stock options	16,581	1,625
Weighted average common shares outstanding – dilutive	<u>2,054,847</u>	<u>2,038,491</u>
Earnings per common share:		
Basic	\$ 0.01	\$ 0.01
Diluted	\$ 0.01	\$ 0.01

For the quarter ended June 30, 2014, 35,000 potential common shares relating to stock options were excluded in the computation of diluted net income per share because the options are anti-dilutive. Anti-dilutive stock options have a weighted average exercise price of \$5.98 at June 30, 2014. For the quarter ended June 30, 2013, 105,000 potential common shares relating to stock options were excluded in the computation of diluted net income per share because the options are anti-dilutive. Anti-dilutive stock options have a weighted average exercise price of \$6.38 at June 30, 2013.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Unless the context otherwise requires, references to the "Company", "Mexco", "we", "us" or "our" mean Mexco Energy Corporation and its consolidated subsidiaries.

**Cautionary Statements Regarding Forward-Looking Statements.** Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Forward-looking statements include statements regarding our plans, beliefs or current expectations and may be signified by the words "could", "should", "expect", "project", "estimate", "believe", "anticipate", "intend", "budget", "plan", "forecast", "predict" and other similar expressions. Forward-looking statements appear throughout this Form 10-Q with respect to, among other things: profitability; planned capital expenditures; estimates of oil and gas production; future project dates; estimates of future oil and gas prices; estimates of oil and gas reserves; our future financial condition or results of operations; and our business strategy and other plans and objectives for future operations. Forward-looking statements involve known and unknown risks and uncertainties that could cause actual results to differ materially from those contained in any forward-looking statement.

While we have made assumptions that we believe are reasonable, the assumptions that support our forward-looking statements are based upon information that is currently available and is subject to change. All forward-looking statements in the Form 10-Q are qualified in their entirety by the cautionary statement contained in this section. We do not undertake to update, revise or correct any of the forward-looking information. It is suggested that these financial statements be read in conjunction with the financial statements and notes thereto included in the Form 10-K.

**Liquidity and Capital Resources.** Historically, we have funded our operations, acquisitions, exploration and development expenditures from cash generated by operating activities, bank borrowings and issuance of common stock. Our primary financial resource is our base of oil and gas reserves. We pledge our producing oil and gas properties to secure our revolving line of credit. We do not have any delivery commitments to provide a fixed and determinable quantity of its oil and gas under any existing contract or agreement.

Our long term strategy is on increasing profit margins while concentrating on obtaining reserves with low cost operations by acquiring and developing oil and gas properties with potential for long-lived production. We focus our efforts on the acquisition of royalties and working interest, non-operated properties in areas with significant development potential.

At June 30, 2014, we had working capital of \$438,794 compared to working capital of \$522,216 at March 31, 2014, a decrease of \$83,422 for the reasons set forth below.

For the first three months of fiscal 2015, cash flow from operations was \$425,159, a 4% increase when compared to the corresponding period of fiscal 2014. Cash of \$284,223 was used for additions to oil and gas properties; cash of \$125,000 was used to reduce the balance on the line of credit; and cash of \$19,489 was used for the settlement of derivatives. Accordingly, net cash decreased \$3,584.

## **Texas**

A joint venture in which we are a working interest partner entered into a joint development agreement to develop the Wolfcamp B formation using horizontal drilling and multi-stage fracture stimulation on a 1,125-acre tract in Reagan County, Texas. There are seven (7) prospective drill sites on this acreage planned to be drilled during calendar year 2014. The first three wells have been drilled and are currently undergoing completion procedures. Our share of the costs for these wells through June 30, 2014 and to purchase additional working interests for our now approximate 1.45% working interest (1.25% net revenue interest) was approximately \$368,000.

In April 2014, we participated in the drilling of a horizontal well in the Wolfcamp formation of the Lin Field of Reagan County, Texas. The unit, operated by EOG Resources, Inc., contains 3 producing wells on approximately 500 acres. Mexco's working interest in this unit is .8086% (.6064% net revenue interest). Our share of the costs to drill this fourth well through June 30, 2014 was approximately \$14,000.

We participated in the drilling of two horizontal wells and one vertical well in the Penn Detrital formation of the F A Hogg Field of Winkler County, Texas. One well has been completed and is currently producing. The other two wells are undergoing drilling and completion operations. The three units, now operated by Apache Corporation, contain approximately 1,900 acres. Mexco's working interest in these wells is .4167% (.3125% net revenue interest). Our share of the costs to drill and complete these wells through June 30, 2014 was approximately \$60,000. Subsequently, in July 2014, Apache announced plans to drill another horizontal well in the Strawn formation.

We participated in the drilling of a well to an approximate depth of 5,000 feet in the Grayburg and San Andres formations of the Fuhrman-Mascho Field of Andrews County, Texas. This well has been completed and is now producing. The unit, operated by Cone & Petree Oil & Gas Exploration, Inc., contains 160 gross acres and a total of ten (10) wells – four (4) producing oil from the San Andres formation and six producing oil from the Grayburg and San Andres formations. Our share of the costs for our approximate 16.2% working interest (11.66% net revenue interest) of this last well through June 30, 2014 was approximately \$109,000. This property contains an additional six (6) potential drill sites in the Grayburg and San Andres formations with three (3) planned to be drilled in 2014.

## **New Mexico**

We agreed to participate in the drilling of two horizontal wells in the Bone Springs formation of Lea County, New Mexico. The two units, operated by Cimarex Energy, contain approximately 800 acres. One well has been completed and is currently producing. The second well is in the planning stages. Mexco's working interests in these wells range from .047% to .125% (.033% to .088% net revenue interest). Our committed share of the costs to drill and complete these wells is approximately \$11,600.

A joint venture in which Mexco is a working interest partner entered into a joint development agreement for two wells to develop the Avalon Shale portion of the Bone Spring formation using horizontal drilling and multi-stage fracture stimulation on acreage in Lea County, New Mexico. Mexco's share of the costs for the first well was \$22,500 for our approximately 0.326% working interest (0.24% net revenue interest).

A joint venture in which Mexco is a working interest partner entered into a joint development agreement to develop the Avalon Shale portion of the Bone Spring formation using horizontal drilling and multi-stage fracture stimulation on a 640-acre tract in Lea County, New Mexico. There are 12 prospective drill sites on this acreage. The first well has been completed with initial production rates showing the well flowing at the rate of 1,255 barrels of oil and 2.523 million cubic feet of natural gas per day. Mexco's share of the costs for these first two wells was approximately \$64,000 for our approximately 0.56% working interest (0.42% net revenue interest).

We agreed to participate in the drilling of a horizontal well in the Willow Lake Pool of the 2<sup>nd</sup> Bone Spring Sand formation of Eddy County, New Mexico. The lease, operated by Nadel and Gussman Permian, LLC, contains approximately 240 acres with one producing well. One hundred sixty of these acres are dedicated to the new well unit. Mexco's working interest in the new well is .117% (approximately .094% net revenue interest). Our committed share of the costs to drill and complete is approximately \$8,000.

## North Dakota

In March 2014, we purchased for \$57,000, a royalty interest in 320 gross acres (15 net mineral acres) subject to a 3/16ths royalty lease in the Bakken Shale formation of Billings County, North Dakota. This acreage currently contains one newly drilled horizontal well operated by Continental Resources, Inc. Initial production results show this well producing at an average rate of 280 barrels of oil and 323 thousand cubic feet of natural gas per day. All of this acreage is free of expenses to Mexco for drilling, development and operations.

We are participating in other projects and are reviewing projects in which we may participate. The cost of such projects would be funded, to the extent possible, from existing cash balances and cash flow from operations. The remainder may be funded through borrowings on the credit facility and, if appropriate, sales of our common stock.

Crude oil and natural gas prices have fluctuated significantly in recent years. Lower product prices reduce our cash flow from operations and diminish the present value of our oil and gas reserves. Lower product prices also offer us less incentive to assume the drilling risks that are inherent in our business. The volatility of the energy markets makes it extremely difficult to predict future oil and natural gas price movements with any certainty. For example in the last twelve months, the NYMEX WTI posted price for crude oil has ranged from a low of \$88.00 per bbl in January 2014 to a high of \$107.00 per bbl in September 2013. The Henry Hub Spot Market Price ("Henry Hub") for natural gas has ranged from a low of \$3.27 per MMBtu in August 2013 to a high of \$8.15 per MMBtu in February 2014. On June 30, 2014 the WTI posted price for crude oil was \$101.75 per bbl and the Henry Hub spot price for natural gas was \$4.39 per MMBtu. Management is of the opinion that cash flow from operations and funds available from financing will be sufficient to provide adequate liquidity for the next fiscal year.

**Contractual Obligations.** We have no off-balance sheet debt or unrecorded obligations and have not guaranteed the debt of any other party. The following table summarizes our future payments we are obligated to make based on agreements in place as of June 30, 2014:

	Payments Due In:			
	Total	less than 1 year	1-3 years	3 years
Contractual obligations:				
Secured bank line of credit (1)	\$ 2,300,000	\$ -	\$ 2,300,000	\$ -
Leases (2)	\$ 45,440	\$ 23,442	\$ 21,998	\$ -

(1) These amounts represent the balances outstanding under the bank line of credit. These repayments assume that interest will be paid on a monthly basis, no additional funds will be drawn and does not include estimated interest of \$60,939 less than 1 year and \$25,391 1-3 years.

(2) The lease amount represents the monthly rent amount for our principal office space in Midland, Texas under one three year lease agreement effective April 1, 2013 and a second three year lease agreement effective April 1, 2014. The total obligation for the remainder of the leases is \$61,609 which includes \$16,169 billed to and reimbursed by our majority shareholder for his portion of the shared office space.

**Results of Operations – Three Months Ended June 30, 2014 Compared to Three Months Ended June 30, 2013.** For the quarter ended June 30, 2014, there was net income of \$19,054, an 18% increase compared to \$16,131 for the quarter ended June 30, 2013. This was a result of an increase in operating revenues partially offset by an increase in operating expenses and an income tax benefit.

*Oil and gas sales.* Revenue from oil and gas sales was \$1,006,656 for the quarter ended June 30, 2014, a 2% increase from \$984,269 for the quarter ended June 30, 2013. This resulted from an increase in oil and gas prices partially offset by a decrease in gas production.

	<u>2014</u>	<u>2013</u>	<u>% Difference</u>
Oil:			
Revenue	\$ 629,128	\$ 621,965	1.2%
Volume (bbls)	6,743	6,761	-0.3%
Average Price (per bbl) (a)	\$ 93.30	\$ 91.99	1.4%
Gas:			
Revenue	\$ 377,528	\$ 362,304	4.2%
Volume (mcf)	88,061	95,596	-7.9%
Average Price (per mcf)	\$ 4.29	\$ 3.79	13.2%

(a) After giving effect to our derivative instruments, the average sales price per Bbl of oil was \$90.41 for the quarter ended June 30, 2014 compared to \$91.06 for the quarter ended June 30, 2013.

*Production and exploration.* Production costs were \$310,778 for the three months ended June 30, 2014, a 1% increase from \$308,636 for the three months ended June 30, 2013. This was primarily the result of an increase in production taxes from an increase in sales.

*Depreciation, depletion and amortization.* Depreciation, depletion and amortization ("DD&A") expense was \$300,815 for the first quarter of fiscal 2015, a 2% increase from \$295,033 for the first quarter of fiscal 2014, primarily due to a decrease in gas reserves partially offset by an increase in oil reserves and a decrease in gas production.

*General and administrative expenses.* General and administrative expenses were \$350,337 for the three months ended June 30, 2014, a 12% increase from \$311,470 for the three months ended June 30, 2013. This was primarily due to an increase in accounting, salary and insurance expenses.

*Interest expense.* Interest expense was \$15,770 for the first quarter of fiscal 2015, a decrease of 22% from \$20,130 for the first quarter of fiscal 2014 due to a decrease in borrowings.

*Derivatives.* For the quarter ended June 30, 2014, we recorded derivative losses of \$33,628 reflecting \$19,489 of realized losses and \$14,139 of unrealized losses resulting from its oil swap agreement. For the quarter ended June 30, 2013, we recorded derivative losses of \$27,392 from its oil swap agreement (\$6,335 of realized losses and \$21,057 of unrealized losses).

*Income taxes.* There was an income tax benefit of \$17,381 for the three months ended June 30, 2014 compared to an income tax expense of \$6,818, for the three months ended June 30, 2013. The effective tax rate for the three months ended June 30, 2014 was (1,039%) compared to 30% for the three months ended June 30, 2013. This was the result of an increase in the statutory depletion carryforward.

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

The primary source of market risk for us includes fluctuations in commodity prices and interest rates. All of our financial instruments are for purposes other than trading.

**Commodity Risk.** We use price swap derivatives to reduce price volatility associated with certain of our oil sales. Under these swap contracts, we receive a fixed price per barrel of oil and pay a floating market price per barrel of oil to the counterparty based on reported crude oil pricing on the NYMEX WTI. The fixed-price payment and the floating-price payment are offset, resulting in a net amount due to or from the counterparty. Such contracts and any future swap arrangements may expose us to risk of financial loss in certain circumstances, including instances where production is less than expected or oil prices increase. In addition, these arrangements may limit the benefit to us of increases in the price of oil. As of April 1, 2013 and expiring on March 31, 2015, Mexco entered into a 24 month swap agreement with Merrill Lynch Commodities, Inc. for 500 bbls of crude oil per month at a fixed price of \$90 per bbl.

At June 30, 2014, we had a net liability derivative position of \$59,121 related to our price swap derivatives. Utilizing actual derivative contractual volumes as of June 30, 2014, a 10% increase or decrease in forward curves associated with the underlying commodity would have changed the net liability of these instruments by approximately \$46,000. However, any realized derivative gain or loss would be substantially offset by a decrease or increase, respectively, in the actual sales value of production covered by the derivative instrument. If the settled oil price in any month during our agreement period is five dollars per barrel more or less than the fixed price of \$90.00 per bbl, the effect to Mexco would be \$2,500 for that month.

**Interest Rate Risk.** At June 30, 2014, we had an outstanding loan balance of \$2,300,000 under our \$4.9 million revolving credit agreement, which bears interest at an annual rate equal to the BBA LIBOR daily floating rate, plus 2.50 percentage points. If the interest rate on our bank debt increases or decreases by one percentage point our annual pretax income would change by \$23,000, based on the outstanding balance at June 30, 2014.

**Credit Risk.** Credit risk is the risk of loss as a result of nonperformance by other parties of their contractual obligations. Our primary credit risk is related to oil and gas production sold to various purchasers and the receivables are generally not collateralized. At June 30, 2014, our largest credit risk associated with any single purchaser was \$140,035 or 24% of our total oil and gas receivables. We are also exposed to credit risk in the event of nonperformance from any of our working interest partners. At June 30, 2014, our largest credit risk associated with any working interest partner was \$3,520 or 27% of our total trade receivables. We have not experienced any significant credit losses.

**Energy Price Risk.** Our most significant market risk is the pricing for natural gas and crude oil. Our financial condition, results of operations, and capital resources are highly dependent upon the prevailing market prices of, and demand for, oil and natural gas. Prices for oil and natural gas fluctuate widely. We cannot predict future oil and natural gas prices with any certainty. Factors that can cause price fluctuations include the level of global demand for petroleum products, foreign supply of oil and gas, the establishment of and compliance with production quotas by oil-exporting countries, weather conditions, the price and availability of alternative fuels and overall political and economic conditions in oil producing countries.

Declines in oil and natural gas prices will materially adversely affect our financial condition, liquidity, ability to obtain financing and operating results. Changes in oil and gas prices impact both estimated future net revenue and the estimated quantity of proved reserves. Any reduction in reserves, including reductions due to price fluctuations, can reduce the borrowing base under our revolving credit facility and adversely affect the amount of cash flow available for capital expenditures and our ability to obtain additional capital for our acquisition, exploration and development activities. In addition, a noncash write-down of our oil and gas properties could be required under full cost accounting rules if prices declined significantly, even if it is only for a short period of time. Lower prices may also reduce the amount of crude oil and natural gas that can be produced economically. Thus, we may experience material increases or decreases in reserve quantities solely as a result of price changes and not as a result of drilling or well performance.

Similarly, any improvements in oil and gas prices can have a favorable impact on our financial condition, results of operations and capital resources. Oil and natural gas prices do not necessarily fluctuate in direct relationship to each other. Our financial results are more sensitive to movements in natural gas prices than oil prices because most of our production and reserves are natural gas. If the average oil price had increased or decreased by one dollar per barrel for the quarter ended June 30, 2014, our pretax gain would have changed by \$6,743. If the average gas price had increased or decreased by one dollar per mcf for the quarter ended June 30, 2014, our pretax gain would have changed by \$88,061.

#### **Item 4. Controls and Procedures**

**Evaluation of Disclosure Controls and Procedures.** We maintain disclosure controls and procedures to ensure that the information we must disclose in our filings with the SEC is recorded, processed, summarized and reported on a timely basis. At the end of the period covered by this report, our principal executive officer and principal financial officer reviewed and evaluated the effectiveness of our disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e). Based on such evaluation, such officers concluded that, as of June 30, 2014, our disclosure controls and procedures were effective.

**Changes in Internal Control over Financial Reporting.** No changes in our internal control over financial reporting occurred during the quarter ended June 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II – OTHER INFORMATION

### Item 1. Legal Proceedings

We may, from time to time, be involved in litigation and claims arising out of our operations in the normal course of business. We are not aware of any legal or governmental proceedings against us, or contemplated to be brought against us, under various environmental protection statutes or other regulations to which we are subject.

### Item 1A. Risk Factors

There have been no material changes to the information previously disclosed in Item 1A. "Risk Factors" in our 2014 Annual Report on Form 10-K.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

### Item 3. Defaults Upon Senior Securities

None.

### Item 4. Mine Safety Disclosures

None

### Item 5. Other Information

On June 25, 2014, the Board of Directors of the Registrant appointed Michael J. Banschbach to the Board of Directors of the Registrant effective July 1, 2014. Mr. Banschbach is expected to stand for election at the 2014 Annual Meeting of Shareholders on September 9, 2014 for a term of one year.

### Item 6. Exhibits

- 31.1 Certification of the Chief Executive Officer of Mexco Energy Corporation
- 31.2 Certification of the Chief Financial Officer of Mexco Energy Corporation
- 32.1 Certification of the Chief Executive Officer and Chief Financial Officer of Mexco Energy Corporation pursuant to 18 U.S.C. §1350

## SIGNATURES

Pursuant to the requirements of the Securities and Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

MEXCO ENERGY CORPORATION  
(Registrant)

Dated: August 6, 2014

/s/ Nicholas C. Taylor  
Nicholas C. Taylor  
Chairman of the Board and Chief Executive Officer

Dated: August 6, 2014

/s/ Tamala L. McComic  
Tamala L. McComic  
President, Chief Financial Officer, Treasurer and Assistant Secretary

**CHIEF EXECUTIVE OFFICER CERTIFICATION****CERTIFICATION**

I, Nicholas C. Taylor, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Mexco Energy Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) for the registrant and have:
  - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Chief Financial Officer

CERTIFICATION OF  
CHIEF EXECUTIVE OFFICER AND CHIEF FINANCIAL OFFICER  
OF MEXCO ENERGY CORPORATION  
PURSUANT TO 18 U.S.C. §1350

In connection with the Quarterly Report of Mexco Energy Corporation on Form 10-Q for the quarterly period ended June 30, 2014, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), the undersigned, in the capacities and on the dates indicated below, each hereby certify pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of their knowledge:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of Mexco Energy Corporation as of the dates and for periods presented as required by such Report.

Date: August 6, 2014
